

Timothy Wang

Frontend Engineer · React / TypeScript / Next.js · Accessibility & Testing

Sydney, Australia · timothy.zehao.wang@gmail.com

linkedin.com/in/timothy-w-8bbb521b0 · github.com/timzw961 · timzwang.dev

Frontend Engineer with senior-level ownership building React, TypeScript and Next.js applications across high-traffic booking, payments and customer-facing platforms. Strong focus on accessibility, testing architecture, CI/CD optimisation and reliable delivery across conversion-critical flows processing ~A\$2M in daily transaction value.

EXPERIENCE

Self-employed

Jun 2026 – Present

Freelance Software Engineer | AI Evaluation

- Create frontend development tasks and evaluate AI-generated implementations against defined requirements.
- Analyse coding agents' reasoning and code changes, identifying functional issues, edge cases and differences in solution quality.
- Develop detailed evaluation rubrics and provide structured ratings and written feedback on agent performance.

Qantas Group

Aug 2023 – Mar 2026

Senior Frontend Engineer | Qantas Hotels

Apr 2025 – Mar 2026

- Built React/TypeScript features across Qantas Hotels booking and checkout journeys processing ~A\$2M daily, improving reliability across conversion-critical flows.
- Resolved a checkout blank-page failure affecting an estimated ~5% of checkout page loads and blocking booking completion.
- Co-designed automated accessibility testing using axe-core, eslint-plugin-jsx-a11y, jest-axe and Pa11y-CI, sustaining WCAG 2.1 AA with zero production regressions.
- Overhauled Cypress E2E coverage, reducing feedback time from 40+ to ~10 minutes and stabilising critical booking-flow tests.
- Implemented Optimizely location-based campaign targeting for double/triple-points promotions, supporting 10+ production campaigns.
- Mentored a technology graduate through code reviews, pairing and RTL/Jest upskilling, improving team testing consistency.
- Delivered 250+ Enzyme-to-RTL migrations using a reviewed Gemini-assisted workflow, improving test maintainability while retaining engineer review.

Technology Graduate | Rotational Program

Aug 2023 – Apr 2025

- Rotated across Qantas Money frontend engineering, Core Platforms Technology Enablement and Group Cyber Automation, contributing to customer-facing products and internal platforms.
- Delivered Next.js features and GA4 instrumentation for Qantas Pay; led a duplicate-check solution for travel insurance redemptions, eliminating repeat charges from timeout mismatches.

Digital Transformation Graduate | HLB Mann Judd

Feb 2023 – Aug 2023

- Automated reporting and client engagement workflows using Power Automate, removing weeks of manual processing per cycle and contributing to six-figure annual cost savings.

SKILLS

Languages & Frontend: TypeScript, JavaScript, React.js, Next.js, Vite, HTML5, CSS3/Sass, Tailwind, Redux, Design Systems

Architecture & Platforms: SSR/SSG, BFF patterns, Node.js, REST APIs, GraphQL, Optimizely, Contentful, Sanity CMS

Accessibility & Quality: WCAG 2.1 AA, ARIA, semantic HTML, axe-core, Pa11y, jest-axe, Cypress, Playwright, Jest, RTL

DevOps & Tools: Buildkite, GitHub Actions, CI/CD, Git, Splunk, Postman, Storybook, Gemini, Claude, OpenAI Codex

PROJECTS

Rally Reserve | Next.js 16, React 19, TypeScript, PostgreSQL, Prisma, Auth.js, Zod, Jest + RTL, Playwright

[Live app](#)

- Built a full-stack tennis court booking platform with multi-tenant venues, per-venue timezones, loyalty rewards, recurring bookings, concurrency-safe reservations and 300+ tests.

EDUCATION

Bachelor of Computer Science (Software Engineering) | University of Wollongong

2019 – 2022

High Distinction Average · Dean's Merit List (2020–2022)
